

Poster Display Case

Stylish .. Hinged Door Notice case ... that's ideal for displaying all printed information.

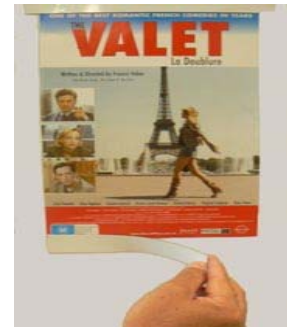

The case features a magnetic background. This background is ideal for a host of applications ... because there's nothing to fade, rot or rust. Posters are held in place using white magnetic strips which are supplied and can easily be cut to size.

The frame is available with a slimline 35mm depth (from the wall) and comes in either satin silver or bright gold.

Each case is supplied with 2 locking screws as standard or a lock and key is available as an option. We recommend using 2 locks for cases larger than 750mm in height.

Posters are easily held in place with white magnetic strips

Our Poster Display Cases are not guaranteed to be 100% waterproof. We do however have a case that is waterproof. (ask for a separate PDF on this).

Generally, most locations are either indoors or indeed covered with an awning ... so these cases are ideal in most applications.
