

Parrot Projection Screens

... Project your best image

Wall / Ceiling Mounted

Tripod

Motorised

The Parrot range of projection screens represents everything you'll need for the modern meeting room or classroom. People process information with their eyes .. our range of screens help people communicate !

All our screens have an excellent quality flat white PVC surface with a black border for optimum presentation.

- * *Wall mounted* or ceiling hung screens are economical and space saving. This gives you maximum installation flexibility.
- * *Tripod screens* are fully portable and a great aid for presentations on the go. A quality folding mechanism ensures years of hard wearing use.
- * *Motorised* projection screens are sleek and very professional. Ideal for modern meeting rooms and classrooms. A whisper quiet electric motor drives the screens up and down. The screen has an auto stop .. going either up or down. Supplied with a infrared remote control for easy control .. or a wall mounted switch (up, down and stop functions).

Which screen suits you ?

- 1:1 Square and is ideal for projections from Overhead Projectors. This is the purpose for which they were originally designed. A 1:1 screen can be adjusted to a 4:3 or 16:9 ratio e.g. 1250*1250
- 4:3 Are specifically sized for projection from a computer monitor/DVP and video e.g. 2440*1850
- 16:9 Are sized for modern video in cinematic format and High Definition TV e.g 1870*1050mm

Size ?

It's recommended that the screen height should be approximately one third of the distance from the screen to the audience.

It's recommended that the screen height should be approximately one third of the distance from the screen to the audience.

Therefore an audience sitting 4m away from a screen - the screen height should be a minimum of 1333 high - closest size of which is 1520mm.

Therefore an audience sitting 4m away from a screen - screen height should be a minimum of 1333 high - closest size of which is 1520mm.
